

Industrial & Commercial Lighting For Tough Jobs

Industrial & Commercial lighting is our specialty!

Paramount has the fluorescent or HID luminaire for your application. And every unit features high product integrity, plus the advantages of our experience and custom design.

The Ruggedness is built-in

Start with heavy gauge zinc-coated or stainless steel for maximum corrosion protection. Add quality craftsmanship: welding, painting, sealing (on wet location listed models) and assembly. That's made **in the USA**.

Paramount began designing and building industrial luminaires in 1947, with our first Craft Lite® enclosed and gasketed unit. We built some of the first assembly line floor and pit lights for the automotive industry. Later, our T5 fluorescent industrial troffer was one of the first in North America. Our products have changed with the needs of industry, but our commitment to quality is as durable as our product.

Applications

Paramount's high performance lighting is designed to excel in your most demanding situations. You'll find our quality industrial & commercial products in:

- Automotive Assembly
- Manufacturing Facilities
- Distribution and Warehouses
- Schools
- Recreational Facilities
- Correctional Institutions
- Big Box Retail
