
Marine Lighting Performance That's Sealed Up Tight

High Performance Lighting, Ship-Shape From Paramount

Paramount has been a leading supplier of lighting for the marine industry because of quality product, innovative technology, experience and service. For both custom or standard work, our units meet the design challenges and generate high levels of illumination. That's why our lighting can be found in service on waterways throughout the world.

*We design and color-match
luminaires for the
Dampa® Continuous
Ceiling System*

Service

Design, custom materials, meeting deadlines, standing good on our promises. You can count on us for service, delivery and dependability.

Quality

Paramount offers 22 product lines for marine use, all UL Listed for Inside or Inside Drip Proof settings. Each product is union-made and 100% tested with lamps at the factory before shipping. All corrosion-resistant, most are also available in stainless steel.

Whether surface-mount, like our popular Craft Lite® units, or flange-mount, every luminaire receives the same high level of finish to enhance appearance.

Innovation

Paramount has always been a technology leader. Our low profile luminaires are better for design because they take up less space, and allow for more passageway clearance. They also save weight, in some cases 25% or more, which becomes significant with a large number of lites installed.

We utilize new technology and processes to continuously improve reliability and efficiency. Newer lamp designs, like the T5, and electronic ballasts use less energy. Higher efficiency and less weight all contribute to fuel savings aboard ship.

Experience

Paramount's high-quality lighting has been in use in marine applications for over 30 of our 50+ year history. Our experience and design capabilities mean that designers can count on us to produce luminaires to meet any lighting challenge.

Marine Lighting

Applications

Paramount's high performance lighting is designed to excel in your most demanding marine situations. You'll find our quality products in:

- Freighters
- Tugs
- Ferries
- Docks
- Military Vessels
