

# Flange vs Grid Luminaire Details

Paramount's Techniseal® Flange & Grid mount luminaires are engineered and built for specific ceilings, therefore they **cannot be modified** and are **NOT** interchangeable. Please be sure to check ceiling details before placing an order (or quoting, if possible) so the luminaires Paramount builds will fit correctly, resulting in a successful application.

## CROSS SECTION OF FLANGE MOUNT LUMINAIRE

Paramount's standard Techniseal® Flange Series is designed to seal to the bottom edge of a hard lid or drywall ceiling surface by tightening the adjustable swing bars.

## CROSS SECTION OF GRID MOUNT LUMINAIRE

Paramount's Techniseal® Grid Series is designed to seal to the T-Bar ceiling material. Our standard troffer is built for a 1" (15/16") T-Bar and requires **no grid suffix** be added to the part number. If the grid system requires the -G1, -G2, -G4 or -G5 option, please supply the grid manufacturer & model number when ordering.

### MODEL NUMBER DESIGNATIONS

**Standard** = 1" (15/16") T-Bar (no suffix)

**G1** = 1 1/2" T-Bar

**G2** = 2" T-Bar

**G4** = 1 & 1/2" T-Bar

**G5** = 2" T-Bar with Flush Lens

*Note: Special Grids REQUIRE Manufacturer and Model Number*
